

Feeney, Inc. Case Study:

Linstroth Residence in Savannah

Sustainability without Sacrificing Beauty:

Home blends Contemporary Design into Iconic Historic District

OAKLAND, Calif. (April, 2014) – Challenged by restrictions imposed by the local Victorian Historic District and a personal goal of building a sustainable home within a strict budget, sustainability expert Tommy Linstroth and his team achieved sustainability without sacrificing beauty. Linstroth selected CableRail by Feeney railing infill for his new home located in the historic district of Savannah, Georgia; widely known as one of the most picturesque old-style residential districts in the southeast.

Designing for Sustainability

A principal of Trident Sustainability Group in Savannah, Georgia, Linstroth designed and built his new family home in partnership with architect Paul McKeever and contractor R Peacock Construction. Regularly advising companies on such subjects as organizational sustainability and Leadership in Energy and Environmental Design (LEED) certification, Linstroth carefully designed his own home to economically and effectively achieve a high sustainability rating. The home built for \$150/SF is the first LEED Platinum-certified single-family home in Savannah, GA.

The **DesignRail**® aluminum railings were custom designed to match the project specifications, including the use of a highly durable Class I champagne-colored anodized coating on the railing and special screws coated with Stalgard® finish to withstand harsh weather conditions common to the Maui coastal environment. The railings were designed with no visible fasteners and a low profile rounded top rail extruded in 23-foot, 6-inch lengths to minimize butt joints, all expertly installed in collaboration with Honolulu Builders, LLC.

About Feeney

Feeney, Inc. is a leading manufacturer of high quality stainless steel and aluminum architectural products and railing systems. Their products for exterior, interior, residential and commercial applications include **CableRail** stainless steel railing assemblies, **Quick-Connect**® auto-locking cable fittings, **DesignRail**® aluminum railing systems, Sta-Lok® stainless steel rods, Lightline® door canopies and the Trellis Collection line of garden trellises.
