

« Stamping Tools »

Decorative concrete stamping tools allow contractors to create the look of stone, brick, and even natural finishes while saving clients time and money. Textured mats and rollers reproduce linear and geometric patterns with seamless accuracy, while feathered edge “skins” can give concrete the seamless look of slate, marble, or a dirt path. More complex stamps produce intricate medallion designs, which would otherwise require hours of precise saw cuts. When combined with the wide range of color options, stamping tools can give a concrete surface virtually any look a customer desires.

The following is a sampling of manufacturers who offer concrete stamping tools. Visit www.concreteconstruction.net/freeinfo or the manufacturers’ Web sites for more information.

JOE NASVIK

Company	Product	Description	Phone	Web Site
Advanced Surfaces Inc.	Truncated Dome	Safety texture mat meets new Americans with Disabilities Act specifications for handicap curbing.	800-952-5980	www.advancedsurfaces.com
